“I attend the Design Forum each year for the chance to learn about other Lean journeys and interact with members of the Design and Construction Industry. I come away feeling energized and excited to try something new I’ve learned.

The **Target Value Design** learning module gave me a better perspective on the importance of incorporating the entire design and construction team into the development of the guiding principles and values with the Owner. It seemed so obvious after the session that what inspires and guides the team should be produced by the whole team, and not just given to them.”

Andrea Sponsel, Vice President, HKS
