

VIRTUAL LEAN IN DESIGN FORUM

MANAGING, ADJUSTING AND INNOVATING THROUGH DISRUPTION: ACCELERATING FORWARD

MAY 19-20, 2021

Strengthen the design community by participating in the LCI Lean in Design Forum. Topics will be centered around this year's overarching theme, "Managing, Adjusting and Innovating through Disruption: Accelerating Forward". Make plans to join us virtually this May!

Collective skills and commitment play a huge role in the success of the design community. Learn from the best this May when you hear architects, engineers and preconstruction professionals dive deep into discussions about the intersection of Lean methodologies with:

- What we learned in 2020 and what we should accelerate forward
- Diverse mindset/cultural implications
- System Thinking

Registration is now open!

I'm truly excited about the upcoming Design Forum. This year will be an especially energized moment to reflect on a social distanced year and how collaborative, inclusive teams will thrive in our hybrid future. The world is more dynamic than ever and Design Forum is a unique opportunity to share knowledge and connect. Implementing Lean approaches in the design-build process is more important now than ever – we need to create a more collaborative work environment to continue to grow our field for the future."

— Stan Chiu, Director of Healthcare, Gensler
